The ColdPruf collection of base layer products has been carefully developed to provide and maintain comfort in a variety of weather conditions. Whether on the slopes, in a tent, or at your desk, at ColdPruf Base Layer, WE OWN COLD.

MEMBER GROUPS

ColdPruf Technical Fiber is formulated with SILVADUR™ technology providing intelligent freshness protection to minimize odor and odor causing bacteria on fabric.

THERMACHOICE® SYSTEM

This easy-to-use system helps you choose the right base layer product for you and your particular need. When it comes to staying warm, there are two factors to consider: what the weather is doing and what the body is doing. Strike a balance between the two and you're in for a comfortable day in any cold weather environment. Thermachoice is about finding that balance.

ColdPruf FigurFit garments have been crafted for women, by women. FigurFit garments will take you beyond base layer with pieces that transition seamlessly from the slopes to the lodge, the streets to the studio. FigurFit garments reflect the lifestyle of the modern woman through fit, function, and fun.

COLDPRUF WOOL WAYS

Once exclusive to Spanish royalty, Merino wool is still considered some of the finest in the world. That's because Merino sheep boast luxurious layers of hardy fleece that breathe in the summer and insulate in the winter, allowing them to thrive in the most unyielding climates—like New Zealand's Southern Alps.

We use Merino wool for its durability and versatility, along with its natural moisture and odor control. It's soft, lightweight and able to move with the wearer's body and stretch while retaining its shape. Our two-layer engineering traps air between layers to create a natural barrier of warmth, so you feel right at home in any habitat.
